

BARATZA®

Encore™ ESP Pro

Take control of your daily grind and meet the Encore™ ESP Pro, the newest addition to Baratza's best-selling Encore™ series. A grinder for lovers of coffee in all its forms, from fine-tuned espresso to breezy pour-over and everything in between.

A brand new stepless grind adjustment system allows **near-infinite precision** while dialing in.

The integrated flow-control disk **takes consistency up a notch**

Anti-Static ion-generation Technology **keeps your counter cleaner**

Dual-mode settings allow for either **hassle-free auto-stop grinding** when single dosing or timed grinding down to 0.1-second **precision for repeatable perfection.**

Encore™ ESP Pro

Features

Stepless Adjustment

Serious performance with infinite possibilities. Our much reviewed M2 precision steel burrs are integrated into a high resolution, stepless grind adjustment mechanism for unparalleled performance.

Quick-Release Burr System

Built with the future in mind. From cleaning to maintenance to full-blown repairs, the Encore ESP Pro is designed for decades of daily duty. Facilitated by easy burr removal without the use of tools.

Two Hands-Free Grinding Modes

Multitask with two efficient modes that let you grind hands-free: Single Dose Mode with auto-stop grinding and Timer Mode with 0.1 second dosing accuracy.

Active Anti-Static Technology

This is our first grinder to incorporate Anti-Static Technology designed to reduce mess caused by static, leaving you with fluffy, ready-to-tamp espresso grounds.

Flow Control Disk

Whether it's the first or last bean in the hopper, the removable flow control disk carefully controls the flow of beans to the burrs resulting in consistent grind quality throughout the dose.

Bright Display & LEDs

The multi-modal display is designed to let you take control of every brew. Operated with a single rotary knob. LEDs illuminate the grounds bin to monitor every particle as it's ground.

Trusted by Coffee Pros

Baratza's best-in-class customer care, product service, and reputation for quality are why baristas recommend Baratza for any home consumer looking to level up their cup.

Included Accessories

Shut-off Hopper

Extend the capacity of the Encore ESP Pro with the 200g capacity hopper with an integrated shut-off valve to keep your beans safe when the hopper is removed.

Dosing Cup

Enjoy tidy brews with an included dosing cup that allows you to transfer grinds directly into 54mm and 58mm portafilters.
